

Environmental Policy – Pacific Interiors Ltd

We are fully committed to the continual improvement of our environmental management system and to the prevention of pollution. As demonstration of this commitment, we have sought and received recommendation for certification of our Environmental Management System under the requirements of ISO 14001:2004 and will make this policy available to the public.

To fully understand and monitor how our business activities impact the environment, we will review progress of our environmental performance against set objectives and targets.

As part of this review we will assess;

- transport
- minimising the consumption of materials
- minimising waste
- efficient use of water and energy
- use of timber from sustainable forests

We are committed to;

- abiding by all current relevant legislation and all voluntary environmental requirements, exceeding where possible
- reducing pollution, emissions and waste (site waste management plans will be implemented on all projects)
- reducing the consumption of materials, energy and water
- communicating the Policy to anyone working for or on behalf of Pacific Interiors
- raising awareness and encouraging environmental education
- training employees in environmental matters
- assisting our suppliers and contractors to achieve similar environmental standards
- assisting customers to use products and services in an environmentally-sensitive way
- liaising with the local community
- participating in discussions on environmental issues with external partners and clients

This Environmental Policy is supported at the highest levels of management and will be reviewed on an annual basis.

Mike Linforth, Managing Director
